EXPERTISE WITH INTEGRATIONS

Workflow Services by ImageMover has over 10 years of experience integrating with the world's largest, most complex technology platforms, healthcare partners, and government agencies. Our technology has completed security and technology review processes with the largest FDA-regulated imaging vendors, and we've won awards for our innovative solutions.

Works with Any Point-of-Care Test

Sophisticated integrations with premier testing partners:

Compliance

ImageMover software solutions are HIPAA-compliant and protect privacy, security, and integrity of protected health information (PHI). The company follows standards to promote robust security and compliance controls.

Government

#4 reporter to the CDC for COVID test results according to ReportStream

U.S. Department of Health and Human Services

The FDA's Diagnostic Data Program

- Workflow Services is an exclusive FDA partner in its groundbreaking initiative to collect data from POCT taken at pharmacies across the country.
- This first-of-its-kind program is a clear indicator that POCT in non-traditional settings is here to stay and will only continue to grow.

National Institute of Biomedical Imaging and Bioengineering

Recognized as NIH's BIBIB's "Recommended Digital Testing Application" that currently supports the MARS HL7v2 specification with multi-test support.

Certified developer with the Healthcare Information Exchange (HIE), which grants access to records for over 320M patient records / (95%)
